

Bonsai Documentation

Bonsai

Source code for our paper, "Bonsai: Efficient and Optimal Automatic Tensor Rematerialization for Memory-Constrained DNN Training."

For OOPSLA'26 Artifact Reviewers

Quick training guide on training time can be done in a Docker image. Please follow the guide for *Quick training* showed in [QUICK-TRAIN-GUIDE.md](#) in the submission.

Full workflow guide on both training time and solving time with GUROBI solver requires

- Valid GUROBI licence
- To be done on a Anaconda virtual environment. Please follow the guide for *Full workflow* showed in [FULL-WORKFLOW-GUIDE.md](#) in the submission for step-by-step installation guide.

ILP formulation of Bonsai solver can be found from line 1100 in [./rockmate-bonsai/rockmate/src/rockmate/solvers/ilp/ilp_segment_model.py](#).
